

Muhammad Haseeb

Senior Unity Game Developer at TeHu Studio

I am a Senior Unity Game Developer with extensive experience in the gaming industry, specializing in the development of high-quality 2D, 3D simulation, and FPS games. My expertise in C# programming, the Unity engine, and various development tools, combined with a solid understanding of game design principles, enables me to contribute effectively to any game development project.

Skills & Strengths

- Metaverse
- AR Augmented Reality
- Monetization
- Unity 3D
- SDK Development
- Object-Oriented Programming (OOP)
- Game Development
- Firebase Database
- VR Virtual Reality
- Programming
- C#
- Augmented Reality

Experience - 9 years

Senior Unity Developer

TeHu Studio | REMOTE | - Lahore, Pakistan

Aug 2024 - Present

- As a SeniorUnity Developer, I have successfully delivered diverse projects for international clients, specializing in multiplayer, AR/VR, and game optimization. With extensive experience in networking frameworks and monetization strategies, I develop high-quality, performance-optimized games tailored to client needs.

Key Expertise:

- Works on Addressables (Unity's Cloud Content Delivery (CCD) service, Firebase).
- Developed and optimized **multiplayer games** for various clients.
- Proficient in **Fusion 2** (Shared Mode, Host/Client, Server/Client).
- Extensive experience with **Photon PUN 2** and **Mirror Networking** for real-time multiplayer synchronization.
- Developed **AR/VR applications** with immersive gameplay mechanics.
- Worked on **TCG Engine-based card games**, implementing advanced game logic.
- Specialized in **game optimization** to enhance performance across devices.
- Implemented **game monetization** strategies using **Applovin, AdMob, and Unity Ads**.
- Developed **SDKs** for seamless integration into various projects.
- Contributed to **Metaverse-related projects**, focusing on virtual environments and digital interactions.
